

**Wanted: Student research assistant or student for lab rotation**

Do you want to become a

**PSYCHEDELIC RESEARCHER?**

Then you should start early!!!

- **Position:** Student research assistant or student for lab rotation
- **Research field:** Neurophysiological animal research
- **Availability:** ASAP
- **Length:** Min. 6 months (with extension into Master project)
- **City:** Mannheim
- **Country:** Germany
- **Institution:** ZI Mannheim (Univ. Heidelberg)
- **Department:** Institute of Psychopharmacology
- **Group:** Translational Psychopharmacology

---

**Description:**

We are looking for a motivated Master student to assist in neurophysiological and behavioral research on the mechanism of *psychedelic drug action* and the therapeutic applications thereof in the rat model.

The student may work with us as part of his or her lab rotation and/or as a research assistant (HIWI position). Aim is to make the student acquainted with animal research, with particular focus on the applications of *in vivo fiber photometry*.

The student should ideally have an interest in extending his or her work with us into a Master's project at our Institute.

Applications should include a concise CV and a short letter of motivation (1/2 page). Please send to [tobias.buchborn@zi-mannheim.de](mailto:tobias.buchborn@zi-mannheim.de) and [marcus.meinhardt@zi-mannheim.de](mailto:marcus.meinhardt@zi-mannheim.de).
